

RII30920 Certificate III in Civil Construction

General Stream

*Are you working as an operator in the civil construction industry,
participating in a broad range of jobs?*

Course Overview

This qualification reflects the role of a skilled operator working in civil construction, who applies a broad range of skills in a varied work context, using some discretion and judgement and relevant theoretical knowledge.

Delivery and Assessment

There are theory and practical training and assessment components to the course.

Skills will be trained and assessed through a mixture of off-the-job and on-the-job training and assessment.

You may be able to seek recognition for your previous studies or experience. Civil Train offers Recognition of Prior Learning (RPL), Recognition of Current Competency (RCC) and Credit Transfer (CT) for this qualification.

Course Duration

This program is offered as a 36 month Contract of Training. Formal training may be completed in a shorter amount of time.

Entry Requirements

Civil Train will conduct a Foundation Skills entry assessment at a level required to successfully complete the qualification and work in the industry at the level required for this qualification. Potential clients who are identified as not meeting course entry requirements will be assisted with referral to appropriate support services.

Entrants will be required to be employed in the civil construction industry and have a Construction White Card prior to starting training on the qualification.

Contact your local super friendly consultant. They know a bucket load about training for our industry, they'll discuss training methodologies that best suit your business, and they are current with the latest government incentives that may be available to your business.
